

# Ground Mounting System

- Aluminum Ground Mounting System
- U-shaped Pole Ground Mounting System
- Vertical Mounting System
- ZAM Ground Mounting System
- Carbon Steel Single / Dual Pole Mounting System
- Agriculture Mounting System

## Carbon Steel Ground Mounting System

Higher corrosion resistance ability and self-healing features which reduce maintenance and operation costs  
More cost-effective than traditional HDG structures | Less parts to reduce installation time  
Unique clamps with serrated flange nut to be mounted by only one operator and ground pins including earthing function

### Specifications

Tilt Angle:0°-45°      Wind Load:42m/s      Snow Load:3KN/m²      Material:Zn-Al-Mg steel/SUS304
